

NCP-27 Adaptable Conduit Box

Instructions

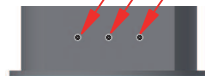

The Adaptable Conduit Box (Part No. NCP-27) is an easy-to-fit accessory that assists with fitting C-TEC's compatible products including smoke detector bases and platform sounders/VADs.

The NCP-27 can be mounted directly onto a surface, or in recesses behind ceiling tiles and plasterboard. Moulded anti-twist spikes, provide anti-rotation for electrical accessories when installed and easy termination of 16 mm or 20 mm cable glands is provided via side and rear drill-out cable entry points. The diagrams below & reverse illustrate installation ideas for the NCP-27.

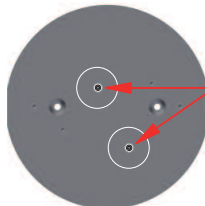

Using the NCP-27 as a Surface Mount Box with a Smoke Detector Base

NCP-27 Side Face Dimples

Use the dimples as drill centres for your holesaw. Only drill the 16 mm or 20 mm holes required.

NCP-27 Rear Face Dimples

Using the NCP-27 with a Ceiling Tile & Smoke Detector Base

Using the NCP-27 with a Ceiling Tile, Quick Connect Plate & Sounder/VAD
