## Description

Model ALN-E(WHT)-SCI is an Optical Smoke Sensor with an integrated short-circuit isolator, which is fully compatible with Hochiki's ESP Analogue Addressable Protocol.

The ALN-E sensor incorporates Hochiki's newest High Performance Chamber Technology removing the need to use Ionisation Smoke Sensors in the majority of applications. This also allows the sensor threshold level to be increased, thereby improving the signal to noise ratio and reducing susceptibility to false alarms.

The smoke chamber is easily removed or replaced for cleaning and utilises a unique improved baffle design which allows smoke to enter the chamber whilst keeping out ambient light.

The sensor features an integral SCI and must be used in conjunction with the YBV-R/4(WHT) mounting base to maintain SCI functionality.
